

Arab Health 2013 was a huge success!

Record attendance: At the fair, and at Analyticon.

The recently ended Arab Health 2013 in Dubai was again extremely successful: For the organizer and Analyticon. With 3,500 exhibitors at nearly 48,000 square meters, the exhibition has set a new record. The improvement for Analyticon was even much greater. Since 2011 the number of contacts has **increased by over 50%!**

A exhibition highlight was the presentation of the Urilyzer 100 Pro, which caused an enthusiastic response. With this new innovative analyzer Analyticon expands its core competence in the field of urinalysis.

Thank you for being our guests at Arab Health 2013!

Your Analyticon team
