

LOEWE funding

For the development of innovative detection methods in the Urinalysis our research and development department generated funding of the Hessian research funding program "LOEWE". In a ceremony with representatives from government, research and industry Hessian Minister of Science Boris Rhein awarded Analyticon with the official certificate against a total of more than 94,000. In cooperation with the Technical University of Central Hesse (casting) Analyticon explores sensitive protein detection and develops tests to reduce user errors.

LOEWE
Exzellente Forschung für
Hessens Zukunft

This project (HA project no. 412/14-02) is funded in the framework of Hessen ModellProjekte, financed with funds of LOEWE – Landes-Offensive zur Entwicklung Wissenschaftlich-ökonomischer Exzellenz, Förderlinie 3: KMU-Verbundvorhaben (State Offensive for the Development of Scientific and Economic Excellence).

THM and Analyticon presented their new project for innovative detection methods at the University of Giessen. (Thomas Schmidts (THM), Mirja Stern, Chair of Urinalysis at the University of Giessen)
